CRYSTAL LAKES AT TRIP

The Crystal Lakes basin encompasses ski terrain of every type and description, from the twitchie steep chute to the gently rolling lake shore. The extreme end of things includes high altitude ridge top bowls with the possibility of vertical drop-in entries, to long narrow rock-lined and tree lined chutes with names like Excess, and Pencil Thin. The lower basin (where we will spend most of our time) is mostly tree gladed slopes from 20 to 30 degrees in grade and lots of variety. The basin itself is exceptionally scenic for something so close to a ski area. In the morning we will meet in the Crystal Mountain brown bag room. The first part of the day will be in area evaluating snow conditions, evaluating the terrain and how to pick the best exposures. In the afternoon we will pick off some good ski lines into the backcountry where we will need our climbing skins to get around. The entire day will be spent doing a lot of skiing, and in between runs, practicing with skins, avi. search beacons and probes, digging "rutschblock" pits and evaluating terrain for stability, skiability, best ascension routes and other essentials. Provided: lift ticket, transit, maps. Date Saturday 1/12 Donation premium for "Adventurer level" (\$85)
